

SLIK-PAK LIMITED

Carbon Reduction Plan

May 2026 Version

Supplier name	SLIK-PAK Limited
Publication date	May 2026
Reporting boundary	UK operations of SLIK-PAK Limited, the bidding/reporting entity
Registered office	Hyde Park House, Cartwright Street, Hyde, Greater Manchester, SK14 4EH
Company number	02684337
VAT registration	GB 606 3697 30

Compliance basis: This Carbon Reduction Plan has been prepared using the structure and content required under Procurement Policy Note 06/21, also referred to in some supplier-assessment contexts as PPN 006, and the associated Technical Standard for Carbon Reduction Plans. Emissions are reported in metric tonnes of carbon dioxide equivalent, tCO₂e, using the Greenhouse Gas Protocol Corporate Standard categories.

Commitment to Achieving Net Zero

SLIK-PAK Limited is committed to achieving Net Zero greenhouse gas emissions by 2050 at the latest for its UK operations. This commitment covers Scope 1, Scope 2 and the relevant Scope 3 categories required for Carbon Reduction Plan reporting. The Board of Directors has reviewed and approved this commitment and this Carbon Reduction Plan.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases produced in the past and are the reference point against which future emissions reductions will be measured. This May 2026 version establishes the baseline for the reporting entity using the best available activity data and reasonable estimates where direct supplier or serviced-office data is not available.

Baseline year: 2025/26. **Baseline period:** 1 April 2025 to 31 March 2026. **Geographical boundary:** United Kingdom.

Emissions source	Description	tCO ₂ e	Basis / explanation
Scope 1	Direct emissions from owned or controlled sources.	0.00	No company-controlled combustion sources, gas boilers, generators, petrol/diesel vehicles or refrigerant equipment identified. Company travel is by electric vehicle.
Scope 2	Purchased electricity, heat, steam or cooling.	0.00	The company operates from a serviced office and does not directly purchase premises energy. No separately metered company energy data under the operational-control boundary.
Scope 3 Category 4	Upstream transportation and distribution.	0.00	No separate upstream transport or distribution activity controlled or paid for directly by the reporting entity was identified. To be reviewed annually.
Scope 3 Category 5	Waste generated in operations.	0.01	Estimated small office-waste allocation for a sole employee in a serviced office. Waste is managed by the serviced-office provider.
Scope 3 Category 6	Business travel.	0.00	No flights, rail travel, hotels, hire cars or other chargeable business-travel activity identified. EV travel has zero tailpipe emissions.
Scope 3 Category 7	Employee commuting.	0.10	Conservative estimate for sole-employee commuting and home/office working travel where relevant. To be refined when fuller activity data is available.
Scope 3 Category 9	Downstream transportation and distribution.	0.00	No downstream transport or distribution activity controlled or paid for directly by the reporting entity was identified. To be reviewed annually.
Total reported emissions	Total Scope 1, Scope 2 and reported Scope 3 categories.	0.11	Total for the required reporting categories above.

Current Emissions Reporting

For this first reporting cycle, current emissions are the same as the baseline emissions above. These figures will be updated annually as actual metered, invoiced or supplier-provided data becomes available.

Emissions source	Current reporting year emissions tCO2e
Scope 1	0.00
Scope 2	0.00
Scope 3 Category 4	0.00
Scope 3 Category 5	0.01
Scope 3 Category 6	0.00
Scope 3 Category 7	0.10
Scope 3 Category 9	0.00
Total reported emissions	0.11

Methodology and Assumptions

Emissions have been reported using the Greenhouse Gas Protocol Corporate Standard and the PPN 06/21 Carbon Reduction Plan reporting categories. The organisational boundary is the UK operations of SLIK-PAK Limited, using an operational-control approach.

Where SLIK-PAK Limited has no direct operational control over an emissions source, such as building energy or centrally managed waste in a serviced office, the plan explains the basis used and reports reasonable estimates where relevant.

Zero values are used only where no relevant activity was identified during the baseline period or where the activity is outside the company's operational-control boundary. These categories will be reviewed annually.

Emissions Reduction Targets

SLIK-PAK Limited will aim to reduce reported emissions against the 2025/26 baseline and to maintain progress towards Net Zero by 2050 at the latest.

Indicative milestones are: 20% reduction in reported Scope 1 and Scope 2 emissions by 2030 where applicable; 70% reduction across all measurable scopes by 2040; and Net Zero across Scope 1, Scope 2 and relevant Scope 3 emissions by 2050 at the latest.

Progress against these targets will be reviewed and reported annually. The company will improve the accuracy of its Scope 3 data where better supplier, serviced-office or transport information becomes available.

Carbon Reduction Projects and Initiatives

SLIK-PAK Limited already follows several good-practice measures that contribute to reduced emissions:

- Use of an electric vehicle for company travel, eliminating direct tailpipe emissions.
- Use of a serviced office environment with centralised energy management and shared facilities, reducing duplicated energy use compared with individual premises.
- Hybrid working where practical to reduce unnecessary commuting and office-related travel.
- Use of digital communication, online meetings and electronic document exchange to reduce avoidable travel and paper use.
- Preference for low-carbon travel options and public transport for business journeys where business travel is required.
- Review of procurement practices to prioritise suppliers and materials with lower-carbon options where commercially and technically practical.
- Engagement with the serviced-office/building management provider to improve visibility of energy and waste data attributable to the company.

Declaration and Sign-off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and the associated guidance and reporting standard for Carbon Reduction Plans. It reports SLIK-PAK Limited's UK Scope 1 and Scope 2 emissions and the relevant subset of Scope 3 emissions categories required by PPN 06/21.

This Carbon Reduction Plan has been reviewed and approved by the Board of Directors of SLIK-PAK Limited. It will be reviewed and updated annually to reflect progress, improved data availability and any newly implemented environmental measures.
